

The construction and management of infrastructure at the period of ten million tourists in Okinawa.

The point

Okinawa prefecture intensifies the promotion of tourism from the point of view that tourism is leading industry in the prefecture economy. Okinawa prefecture is making the process of accepting ten million tourists (including two million foreigners) at 2021 in Okinawa and made the tourism crisis management basic plan. In consideration of these situations we proved how the construction and management of infrastructure has contributed to tourism, made the scenarios of six fields and announced them officially at HP and so on. In this case we arranged them, crossing separate fields (Road, Airport, Port, Dam, Park and so on) from the point of view for tourism. We provide the integrated ability of infrastructure important at the aim of promotion of tourism.

The scenarios of six fields

We arranged the scenarios of six fields from the point of strategic view, considering contents and forms of infrastructure.

1. Construction and management of tourism resources

“Infrastructure is tourism resource”

Shurijo Castle

Kourioohasi Bridge

2. Supporting tourist resorts and the neighborhood

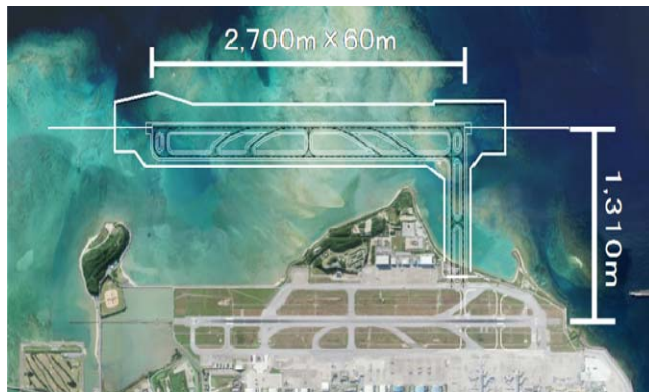

“Regional development with attraction of typical Okinawa”

construction of landscape suitable to ancient city (shuri)

3. Construction and management of traffic networks

“Construction of traffic nodes and networks”

Naha Airport Second runway

Tomigusuku Road Yone Bridge

4. Expansion of information and communication

“Practical use of information and communication in the infrastructure”

Mitinoeki Toyosaki
information of airplane service

Mitinoeki Oogimi
sale of special product

5. Environment reservation and restoration

“Accumulation and use of technology for environment reservation and restoration”

transplant of coral

artificial propagation tree (Nogutigera)

6. Prevention of disasters and crisis management

“Establishment of rapid and exact first-actions at the disaster”

training for prevention of disaster

Harmony with tourism and infrastructure

It is necessary for the period of ten million tourists in Okinawa that tourist industries not only draw tourists but also we construct society which can accept tourists increasing about fifty percents exactly.

We promote construction and management of infrastructure from the point of new view that tourism and infrastructure are harmonized under the scenarios of six fields, and complete to construct useful, safe, secure, good quality society for not only the tourist but also the people of prefecture.
